SUMMARY

Middle Frontend Developer with 3+ years of experience. Built 20+ production platforms across education, food delivery, e-commerce, booking, marketplace, utilities, and logistics (including national teacher training platform with 5k+ educators, Telegram Mini App with 30k+ users & 150+ venues & 300+ branches, education management system for 2k+ students, job marketplace, healthcare booking, cargo tracking, utility payments, and more) - increased engagement by 10-15%, accelerated load time by 15-20%, improved conversion rate by 15-30%, achieved 98% Lighthouse score. Automated reporting systems and parent communication via WhatsApp, reducing reporting preparation time by 50%. Designed scalable systems using Feature-Sliced Design architecture, implemented security-critical features (anti-fraud -25%, RBAC), monetization (Stripe subscriptions), real-time systems (leaderboards, live progress tracking). Expertise in performance optimization, WCAG accessibility, internationalization (8+ languages with RTL support).

SKILLS

Frontend: React (18, 19), Next.js (App Router, SSR, SSG, ISR), TypeScript, JavaScript, Svelte
State Management: Zustand, Redux Toolkit, React Query, Redux, RTK Query
Forms & Validation: react-hook-form, zod (schema validation), Formik, yup
Styling: Tailwind CSS, Material-UI, Radix UI, Shadcn UI, HeroUI, styled-components, Emotion, SCSS, CSS Modules
Build Tools: Vite, Webpack, ESLint, Prettier, Husky, lint-staged
API & Routing: Axios, SWR, REST, React Router (v5, v6, v7), React Table, Recharts, Tiptap, CodeMirror
Animations & Utilities: Framer Motion, react-spring, Swiper, Lottie, Lodash, date-fns, clsx, uuid, use-debounce
Architecture & Patterns: Feature-Sliced Design (FSD), Atomic Design, Context API, Render Props, HOC, Custom Hooks, Design Systems, Error Boundaries, Dependency Injection, SOLID, DRY, KISS
Performance & Accessibility: Core Web Vitals (LCP, FID, CLS), Code splitting, Lazy loading (Suspense), Image optimization (next/image), Bundle analysis, WCAG, ARIA, Semantic HTML, Accessibility testing, SEO optimization
Internationalization: next-intl, i18next, react-intl
Tools & AI: Claude, Codex, Cursor, Antigravity, Gemini, Git, GitHub, GitLab, Figma, Jira, Docker, Swagger

EXPERIENCE

Middle Frontend Developer | Click Food — August 2025 - Present

- Developed Telegram Mini App for food delivery serving 30k+ users and 150+ restaurants - implemented full Telegram WebApp SDK integration with seamless in-app experience without messenger exit, increasing user retention by 25-30%.
- Architected a scalable frontend using Feature-Sliced Design, type-safe React Query data layer, Zod validation, and strategic code splitting to support long-term product growth.
- Implemented multi-step checkout with dish modifiers, promo codes, cashback deduction, and Yandex delivery integration - increased cart completion by 30% and average order value by 15% through friction-free experience for returning customers.
- Integrated multi-level filtering (cuisine type, halal certified, delivery time, rating) and geolocation-based restaurant ranking - enabled fast restaurant discovery in 3-5 seconds, increased restaurant click-through rate by 25%, and served halal-conscious audience demands.
- Built partner dashboard for restaurants with CRUD dish editor, stop-list management, and sales reports - empowered restaurants with full control without developer involvement, simplified their workflow by 35%, and eliminated menu errors.

Strong Junior Frontend Developer | Codify Lab Dev — May 2024 - July 2025

- Contributed to 6 educational products, developing new features for Codify GO, CRM, Academy, Job Codify, Startup Nation, and internal learning platforms.
- Automated teacher reporting and parent communication via WhatsApp - reduced report preparation time by 50% through Smart Reports system with editable tables and retry mechanism.
- Increased student engagement by 30-40% through gamification - implemented XP progression, leaderboards, Code Coins as real rewards, competitive challenges across all platforms.
- Monetized education through Stripe subscriptions - implemented monthly/yearly plans (17% savings for annual), paywall for Pro content, promo code systems without losing free users.
- Achieved high performance and conversion rates - 100% Lighthouse on desktop, 95%+ on mobile, increased lead conversion by 15%, reduced bounce rate by 20% through multi-channel lead capture and segmented funnels.

Junior Frontend Developer | Peaksoft Dev — January 2023 - April 2024

- Contributed to 6 production-grade products (10k+ users across marketplace, e-commerce, booking, education, and testing domains) by implementing multi-channel lead capture, optimizing checkout/booking flows, and integrating trust-building elements (social proof, testimonials, real-time metrics).
- Scaled education platform for 2,000+ students - increased engagement by 40%, teacher productivity by 30%, through 3 rich text editors, interactive tests, automated grading, and real-time progress tracking.
- Implemented security-critical systems with anti-fraud protection - reduced cheating attempts by 40%, maintained 15% sign-up growth, through PrintScreen blocking, tab-switch detection (Visibility API), dual storage (Redux + sessionStorage).
- Accelerated frontend performance across all products - 60% faster load time, WCAG accessibility, multi-language SEO (KY/RU/EN), high Lighthouse scores, integrated Stripe payments, Firebase Auth, CircleCI deployment - zero critical bugs.
- Empowered non-technical teams with independence - built admin panels for marketers, teachers, and moderators to manage content, schedules, and moderation without developer involvement or redeploys.
